

Caleb Moore

Hello

I'm so excited to apply for the Senior CRM Solutions Architect role at Roku! Over the past decade, I've built and scaled CRM frameworks that blend creative precision with technical rigor—most recently implementing the Braze migration and personalization architecture for Audible. My work focuses on modular, data-driven systems that make automated messaging both powerful and human.

Roku's mission to connect and benefit people with the content they love resonates with me. I'd be thrilled to bring my experience in Liquid, Braze, and CRM architecture to help craft dynamic, personalized experiences for millions of streamers around the world.

Warmly,

A handwritten signature in blue ink, appearing to read 'Caleb Moore', with a stylized flourish extending to the right.
