

Caleb Moore

Los Angeles, CA 90026

CRM Solutions Architect / Marketing Technologist

Creative technologist with 10+ years designing and implementing data-driven CRM architectures, modular email frameworks, and automated personalization systems across Braze, Salesforce Marketing Cloud, and other enterprise platforms.

Experience

Razorfish

Associate Director, Engineering (June 2024 – Present)

- Implemented modular CRM frameworks integrating Braze payloads and Liquid logic to scale global personalization across transactional and promotional campaigns.
- Implemented Sonar-to-Braze migration, including strategy, evaluation, and technical alignment across teams.
- Converted 20+ HTML/CSS templates and components from Handlebars to Liquid using Claude-based rulesets to 3x development speed and documentation accuracy.
- Managed email accessibility (a11y) testing and implementation- adhering to WCAG guidelines
- Partnered with lifecycle, product, and engineering teams to align CRM logic, data structures, and API payload delivery.
- Built internal utilities improving workflow automation, template searchability, and process consistency.
- Used SQL and JSON payload logic to power real-time content population and segmentation strategies.
- Owned global transactional email technical implementation, including localization and pricing feature updates

Audible

Associate Director, Template Production (October 2022 – April 2024)

- Developed 20+ modular, scalable email components and a master shell enabling global personalization and automation.
- Collaborated with data and lifecycle teams to implement multilingual and localized personalization strategies driving \$19MM projected growth in new markets.
- Authored global CRM documentation and onboarding materials improving efficiency and governance.
- Standardized and maintained 80+ transactional templates with integrated dynamic data logic.
- Refined workflows, QA, and automation for a 10-person distributed team.
- Worked cross-channel with push and SMS templates to unify CRM messaging.

Rauxa / Formerly Known As

Email, Frontend Developer (June 2018 – October 2022)

- Built responsive, data-driven CRM emails and landing pages integrating with Braze and SFMC APIs for lifecycle optimization.
- Collaborated with analytics teams to optimize journeys and implement automated multi-touch CRM flows.
- Developed React and Vue-based landing experiences connected to real-time personalization frameworks.
- Owned weekly campaign delivery for Alaska Airlines, increasing CTR via A/B testing and audience segmentation.

Drexler

Email Developer, Designer (Sept 2014 – June 2018)

- Built 6,000+ dynamic SFMC emails using AMPscript and data-driven content blocks for global retail clients.
- Improved agency systems, templating standards, and accessibility compliance.
- Created brand and campaign assets for clients including Crate & Barrel, CB2, and Chewy.

Clients

Amazon, Verizon, Microsoft, Deutsche Bank, Audible, Alaska Airlines, Crate & Barrel, CB2, Vans, Lands End, Chewy, Black & Decker, DEWALT, Home Depot, Grainger, Fastenal, Catholic Relief Services, and more.
