Caleb Moore

Los Angeles, CA 90026

MarTech Systems & CRM Technologist

8+ years building and improving CRM systems across Braze, Salesforce Marketing Cloud and more. Specializing in platform migrations, API-driven personalization, campaign troubleshooting, and workflow automation.

Experience

Stitch
Associate Principal Technical Producer *(January 2026 – Present)*

- Continued leading the Sonar-to-Braze migration begun at Razorfish, overseeing transactional campaign migration, API-driven personalization, and operational support.
- Migrated all base email templates and existing modules into reusable Braze Content Blocks.
- Migrate 30+ transactional campaigns to Braze, using Connected Content for API-driven content and custom attributes and events for personalization.
- Diagnosed and resolved campaign issues by tracing root causes, auditing the Braze instance, coordinating fixes with MarTech Outbound engineers, and documenting practices to prevent recurrence.
- Built custom utilities using the Braze API and AI agents to investigate and resolve campaign issues with increased speed and efficiency.
- Provided documentation and support that enable Audible's internal team to operate independently within established guardrails and processes.

Razorfish
Associate Director, Engineering *(July 2024 – December 2025)*

- Implemented modular CRM frameworks integrating Braze payloads and Liquid logic to scale global personalization across transactional and promotional campaigns.
- Spearheaded the migration from the internal Sonar CMS to Braze, including strategy, evaluation, and technical alignment across teams.
- Converted 20+ HTML/CSS templates and components from Handlebars to Liquid using Claude-based rulesets, tripling development speed and improving documentation consistency.
- Managed email accessibility testing and implementation in accordance with WCAG guidelines.
- Partnered with lifecycle, product, and engineering teams to align CRM logic, data structures, and API payload delivery.
- Built AI-powered internal utilities to automate workflows, improve template searchability, and standardize processes.
- Used SQL and JSON payload logic to power real-time content population and segmentation strategies.
- Provided global transactional email support, including localization and pricing feature updates.

Audible
Associate Director, Template Production *(October 2022 – April 2024)*

- Developed 20+ modular, scalable email components and a master shell enabling global personalization and automation.
- Collaborated with data and lifecycle teams on multilingual personalization and localization initiatives projected to generate $19 million in revenue growth across new markets.
- Authored global CRM documentation and onboarding materials improving efficiency and governance.
- Standardized and maintained 80+ transactional templates with integrated dynamic data logic.
- Refined workflows, QA, and automation for a 10-person distributed team.
- Supported push notification and SMS templates to maintain consistency across CRM channels.

Rauxa / Formerly Known As
Email & Frontend Developer *(June 2018 – October 2022)*

- Built responsive, data-driven CRM emails and landing pages integrating with Braze and SFMC APIs for lifecycle optimization.
- Collaborated with analytics teams to optimize journeys and implement automated multi-touch CRM flows.
- Developed React- and Vue-based landing experiences connected to real-time personalization frameworks.
- Owned weekly campaign delivery for Alaska Airlines, increasing click-through rate via A/B testing and audience segmentation.

Clients

Amazon, Verizon, Microsoft, Deutsche Bank, Audible, Alaska Airlines, Crate & Barrel, CB2, Vans, Lands' End, Chewy, Black & Decker, DEWALT, Home Depot, Grainger, Fastenal, Catholic Relief Services, and more.
